jQuery

INTERESTS

I love creating DIY tools in tech or real life, such as web extensions or handmade devices. I have a passion for health, wellness, powerlifting, and nutrition, and I've been learning and experimenting with them since 2023.

FULL STACK WEB DEVELOPER SUMMARY

- I am a full-stack web developer who works with Next.js, React.js, and Node.js.
- I started learning programming at 9, and I landed my first client at 15. Since then, I've been continuously learning, working, and teaching programming.
- I've been learning, working, and teaching programming ever since.

PROFESSIONAL EXPERIENCE

PROJECTS THAT I HAVE COMPLETED

- A Persian version of the webnovel.com website allows users to add books/novels to their library and keep track of their reading progress.
- A Telegram bot that maintains a database of music uploaded by the owner and allows users to search for songs using lyrics they don't know the name of.
- A website for Upload Group, a multi-purpose company located in Sisli, Istanbul, Turkey, featuring functionalities such as booking consultations for real estate, tourism, and cryptocurrency investing. The website will also include a blog section to enhance SEO efforts.
- A web application for AntiqBar, a family restaurant located on Khidis Street in Tbilisi, Georgia, will enable waiters to take customer orders using their phones or iPads. The kitchen's speaker and monitor will receive notifications containing order details. Additionally, kitchen staff can communicate with waiters through the web application using simple and convenient action buttons, such as indicating when orders are ready or if there will be a delay, allowing waiters to offer drinks to customers.

More details can be found on my [Github account](#).
